

# Nextimage

Award-winning software:

**Scan, enhance, save  
with FADGI compliance**

# New in Nextimage 6

- The image quality from Nextimage 6 exceeds the FADGI 3-star rating
  - When used with HD Ultra X, IQ Quattro X, IQ FLEX, SD One MF, ScanStation Pro and MFP Repro
- Support for 'multiple exposures per line' for improved image quality
- Improved ICC color management powered by X-Rite®
- Support for 16/48-bit file output (png and tif only)
- Updated list of supported printers

# Exceeds FADGI 3-star compliance\*

- Contex has a history of scanning and reproducing colors for 30+ years and we understand how important colors are to you
- With Nextimage 6, Contex scanners attain unprecedented levels of color fidelity, providing greater quality for critical applications require accuracy and reliability

\* Applicable to: HD Ultra X, IQ Quattro X, IQ FLEX, SD One MF, ScanStation Pro, MFP Repro

A FADGI 3-star rating signifies a high standard of digitization quality, balancing accuracy and efficiency.

# Multiple exposures for maximum image quality

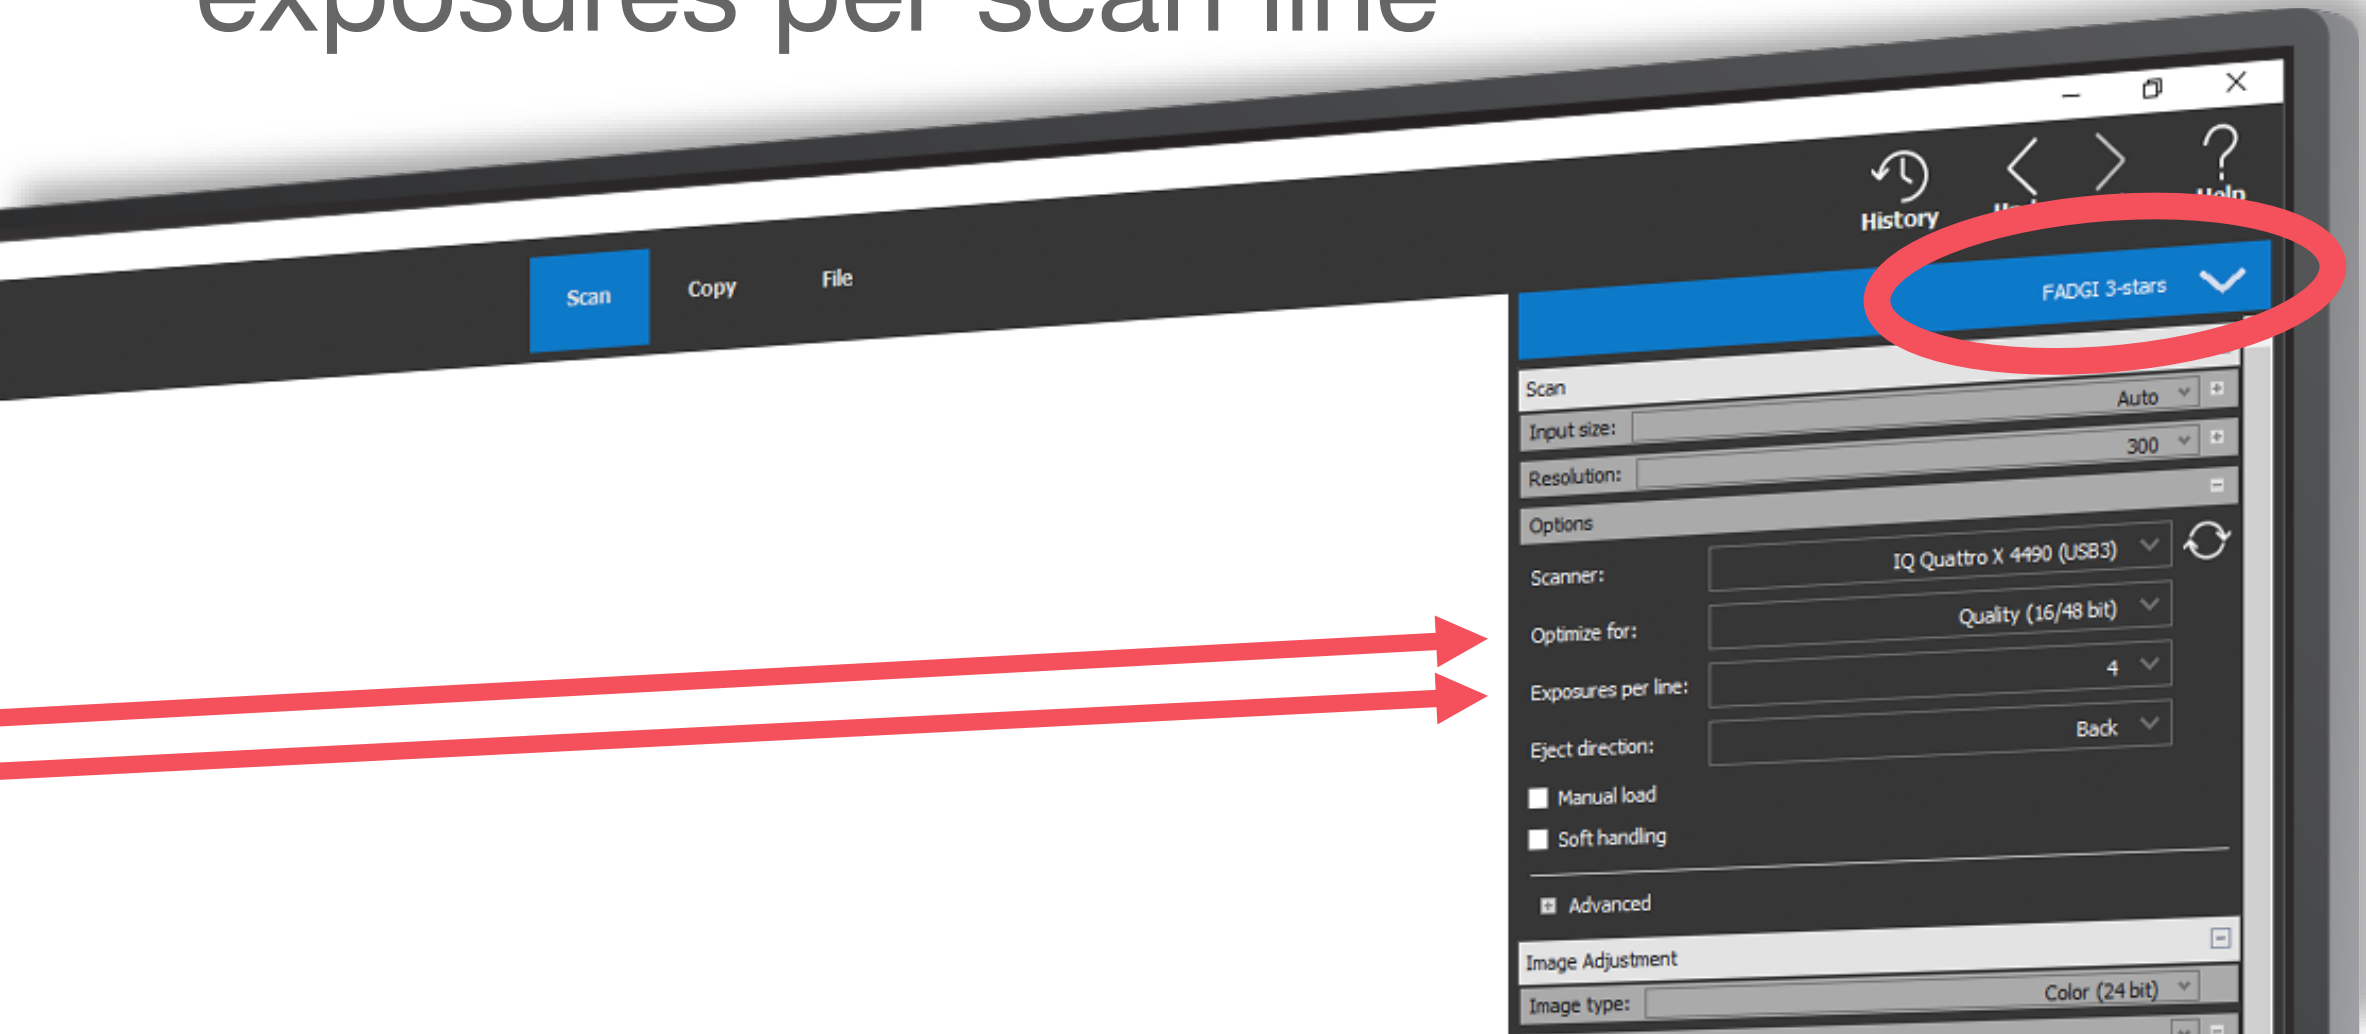

- Nextimage 6 gives you the option to choose speed or quality
- The new quality option scans each scan line multiple times and includes a feature to save your file as 16/48-bit (if PNG/TIFF). Scans made with minimum 4 exposures per line will exceed the FADGI 3-star image quality level
- Choose quality to further reduce image noise and enhance color accuracy
- Choose speed if you do not need additional image noise reduction
- This software choice is applicable for:
  - HD Ultra X
  - IQ Quattro X
  - IQ FLEX
  - SD One MF
  - ScanStation Pro
  - MFP Repro

# Save as 16/48-bit

- Nextimage 6 gives you the option to save as 16/48-bit
- It only applies to PNG or TIFF file formats
- For majority of scanners

# FADGI 3-star preset with multiple exposures per scan line

# Scanners exceeding FADGI 3-stars

- FADGI compliance and saving in 16/48-bit requires a great deal from the scanner hardware, and the compliance is obtainable in combination with Nextimage 6 for the following scanners:
  - HD Ultra X
  - IQ Quattro X
  - IQ FLEX
  - SD One MF
  - ScanStation Pro
  - MFP Repro

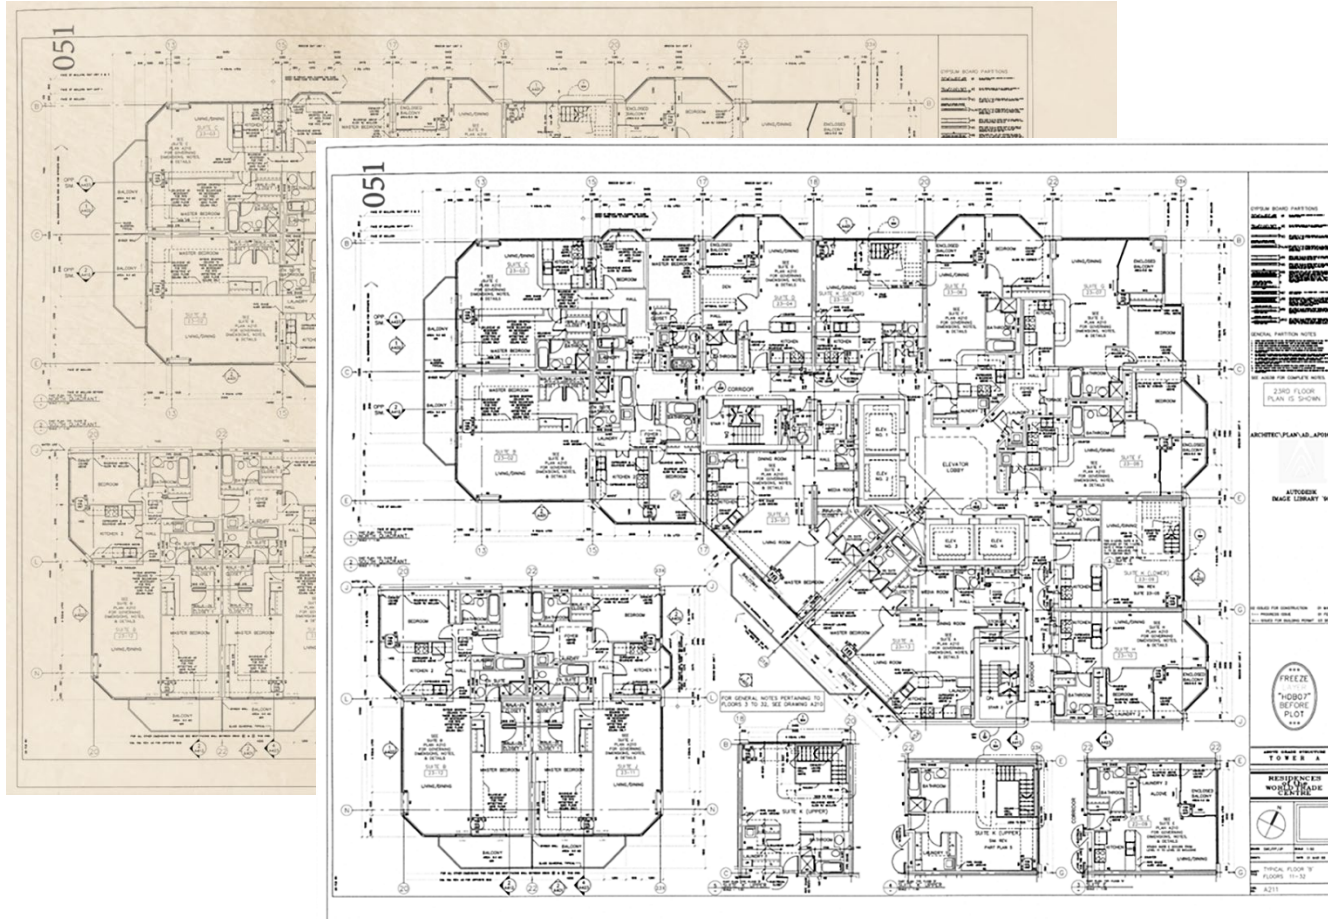

# ICC color management

- The color management in Nextimage 6 and the connected WIDEsystem is powered by X-Rite®
- X-Rite is the global leader in color science and technology and the company includes color industry leader Pantone, Inc.

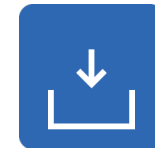

# Every scanning need in one flow

# Proprietary image enhancement technologies

- Auto-generated 8-bit color palette
  - if you need a smaller file size
- ICC color management
  - to preserve colors when files are loaded into other applications
- Closed Loop Calibration (CLC)
  - will create a media profile that is optimized for the individual media in the printer
- Scan preview
  - a rolling 1:1 view as you scan, to indicate if you need to adjust
- Intelligent sharpen/smoothing filters
  - intelligently removed pattern noise without blurring the edges
- Adaptive thresholding algorithm
  - combines background cleaning and preservation of grayscales

# One-Touch Button Support

## Customized One-Touch:

- Assign any custom Nextimage Preset to any button
- Default Presets included as well
- WIDEsystem “reserves” the buttons for each user

One-Touch Setup

# Ultra long PDF & TIFF scanning

## Scan to Multipage file

- Scanning ultra long documents in PDF creates a multi page file that can be viewed as one continuous image.

## Open and Edit Multipage file

- Thumbnails for each page
- Reorder pages in file
- Delete pages in file

# New printer drivers

- Now more than **400 printers** supported directly in Nextimage Repro
- The most **complete list** of integrated printer drivers in the industry
- **Control the printer** and see printer status directly in the Nextimage interface
- Closed Loop Calibration (CLC) – will **create a media profile** that is optimized for the individual media in the printer
- Drive any large or small format printer by using **Windows printer driver** (also Nextimage Scan & Archive)
- Connect to an **unlimited number of printers** and enhance the value of all your large format devices

1. Scan with multiple exposures per scan line with the 'Quality' option to significantly reduce image noise and ensure more accurate colors. Applicable for: HD Ultra X, IQ Quattro X, IQ FLEX, SD One MF, ScanStation Pro, MFP Repro
2. Reopen scanned images with the RAW image information still intact and adjustable

# Nextimage Remote app

With the Nextimage Remote app on your tablet you can control and operate your Nextimage scan and copy presets remotely via Wi-Fi and save valuable time.

# Nextimage Remote app

- With the Nextimage Remote app on your tablet you can control and operate your Nextimage scan and copy presets remotely via Wi-Fi.
- Nextimage Remote allows the scanner to be moved away from the scanner PC for maximum convenience and user comfort.
- The app can vastly reduce the number of times the operator needs to move between the scanner and the workstation.

**That way, Nextimage Remote helps you improve your workflow and become more productive.**

# It is great that ...

## ... as a distributor

- You get the best scanning and coping software available
- You have access to a solution which has won multiple awards
- It is an easy to use and full featured software package dedicated to wide format scanning

## ... as a customer

- You get the best wide format scanning software available
- All the features you need in a form that can be tailored to your specific needs
- Easy, intuitive and powerful software

# Nextimage

## The pitch

- Nextimage 6 let scanners exceed the FADGI 3-star compliance for majority of Contex scanners
- Nextimage is a highly awarded wide format scanning and copying software
- It has a strong feature set in a user-friendly design that will make any scanning task fast, easy and accurate
- The best software available uniquely designed to make the best of your Contex scanner
